

c Constraints Across Granularities

Fine-Coarse Distributional Constraint

Predicted joint distribution

$$P_{\text{pred}} = \text{Law}(\Pi e_a, \Pi T_{a \rightarrow b}(e_a))$$

← Constraint →

$$\mathcal{L}_{\text{JointMMD}}^{a,b} = \text{MMD}_{\kappa_a \otimes \kappa_b}^2(P_{\text{pred}}, P_{\text{obs}})$$

Observed joint distribution

$$P_{\text{obs}} = \text{Law}(e_a, e_b)$$
